What is RunLock?

RunLock consists of two parallel ropes that are locked together so that they form continuous and regular loops. RunLock is a Swedish product of highest quality, manufactured in 100% polyester, and available in six different sizes. It's flexible and does not break at heavy snatches. RunLock does not have to be spliced or knotted- and therefore retains its strength in all situations.

Thanks to the ingenious construction you will never end up with locks that are difficult to untie, no matter how hard the RunLock knot is locked. A lock can be created anywhere on the rope and easily moved if necessary. The flexible loop design creates endless possibilities and user areas. Only the users imagination sets the limit. For more information and inspiration on how to use RunLock, please visit www.RunLock.com

Basic RunLock locks...

Sizes

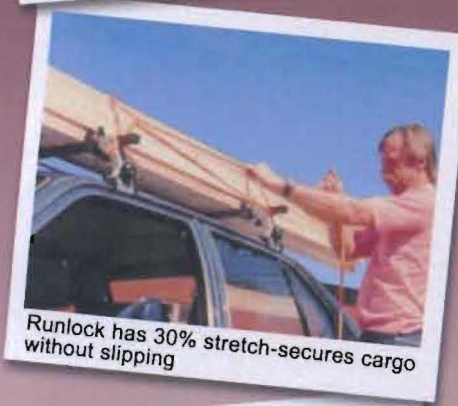

No.	Diameter (mm)	Size of eye (mm)	Strength (Kg)	Stretch (%)	Wt / meter (g)
4	4	40	170	30	13
